

ICT at Bowerham

At Bowerham Primary School we are lucky to have a great deal of ICT equipment.

- We have a significant number of ipads, tablets and laptops in each classroom for children to use when necessary. Each class has an interactive whiteboard and a computer station. This intensive amount of ICT equipment allows us provide our children with access to ICT to support their learning throughout the curriculum.
- Discrete computing skills are taught in the classroom as all of our ICT equipment is available to be brought to the children, in class.
- Children have their own area of the computer network to save and adapt their work.
- Our school website is the place to go if you have any unanswered questions! This is updated regularly for you access to the latest information. We also use other social media sites like Facebook to update you on your child's learning experience in school.
